### QUALITY PARAMETERS

This product is produced and processed under hygienic conditions. Product is not irradiated, treated with sewer sludge, or produced with genetically modified materials.

### PROCESS DESCRIPTION

Organic Blue Agave Syrup with Allulose is a sweet syrup. It is obtained by extracting, purifying, and hydrolyzing the naturally occurring carbohydrates found in the Blue Agave plant. Enzymes are used to convert much of the Fructose in the syrup into Allulose, which is an undigestible carbohydrate. This gives the syrup lower levels of declared sugars and calories.
